For Your Assessments,

Our Vision

To become the "primary manufacturer" for each company in the national / international pharmaceutical industry

Our Mission

Using our extensive know-how and advanced technology, provide products and services at the highest quality standards with optimum costs under already established suitable environmental conditions.

For this reason we preferred the ProManage system with Doruk Automation and Software Company

Instant monitoring of our products, to be able to produce fast and lasting solutions,

Follow-up and development of automation in work flows, monitoring and development of machinery, equipment, personnel, department activities.

Key Success Factors In Achieving Our Mission

Flexibility, Long term collaboration, External / Internal Customer satisfaction

On time Delivery of commitments, Environmental conciousness

Commitment to proactively follow and implement all regulatory changes.

Evaluations of system purchase

We spent three months in geography and country conditions to determine the most professional team and software.

Complete systems can be fully deployed within a total of six months including system analysis, hardware design, software configurations, ERP integrations and validation operations.

Professional staff, with excellent cooperation was immediately adhered to the system immediately.

In the first year, OEE, TEEP and KPI benefit values increased by 10% with manual follow-up after installation, frequent trainings and analyzes.
